PROFESSIONAL SUMMARY

Software Engineer and Business Information Technology graduate focused on building practical, intelligent, and scalable technology solutions. I have hands-on experience across frontend, backend, mobile, databases, APIs, and cloud technologies, with a strong foundation in JavaScript, TypeScript, React, React Native, Node.js, Python, SQL, and C#. My experience includes contributing to live production software, developing client solutions, implementing business systems, analysing data, and translating real-world requirements into working applications. I am particularly interested in the intersection of software engineering, AI, data, and cybersecurity, and I enjoy tackling complex problems where technology can turn information into useful decisions and outcomes.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, React Native, Flutter, UI/UX principles

Backend: Node.js, Python, C#, REST APIs, JWT Authentication, Prisma ORM

Databases: PostgreSQL, MySQL, MongoDB, Firebase, SQL Server

Tools & DevOps: Git, GitHub, Docker (basic), Firebase Services, Azure Devops

Core Competencies: System Implementation, Backend Operations, Data Analysis, System Optimization, Debugging & Testing

PROFESSIONAL EXPERIENCE

Junior Software Engineer — She Leads

October 2025 – Present | Johannesburg, South Africa

- Contribute to a live production web application using React, Node.js, and PostgreSQL within structured Agile sprints.
- Reduced active bug count by systematically resolving recurring issues and strengthening test coverage, improving release stability.
- Strengthened coding standards through peer code reviews — applying input validation, parameterised queries, and clean error handling.
- Participate in sprint planning, daily stand-ups, and retrospectives across a cross-functional team.

Rugby Statistician — Rugby Analytics

July 2022 – December 2022 | South Africa

- Delivered accurate, real-time statistical coding during live matches across major competitions, including Craven Week, the Carling Currie Cup, and the Top 14.
- Carried out detailed post-match data coding, reviewing footage to verify and refine data accuracy beyond what could be captured live.
- Built and maintained custom Excel spreadsheets to log, organise, and validate match data, ensuring clean, reliable datasets for analysis.
- Worked to tight deadlines to deliver data that informed tactical decisions and performance assessments.

IT Assistant / POS System Implementation — My Bizz Space

June 2019 – December 2019 | Johannesburg, South Africa

- Led end-to-end installation and configuration of a Point of Sale (POS) system for a new furniture business.
- Digitized the full product inventory and implemented a structured database for real-time stock tracking.
- Trained staff on system usage and provided post-implementation technical support.
- Improved operational efficiency and accuracy through workflow automation and system optimization.

EDUCATION

Diploma in Business Information Technology (Software Development Major) — University of Johannesburg

February 2022 – November 2024

Relevant coursework: Software Development, Information Systems, Business Analysis, Communication Networks

CERTIFICATIONS

- Certificate in Full Stack Development — IT Varsity / FNB, 2024

LANGUAGES

English: Full Professional Proficiency
French: Professional Working Proficiency
